From the Desk of the President

Dear member,

Greetings from TNOA

I am very happy to write this letter.

First I wish to congratulate and thank each and every individual member for having participated in the Bone and Joint week celebration and made it a grand success.

Our journal JOJS is now indexed in DOAJ which is recognised by NMC. My congratulations to the editorial team Dr SURESH, KUMAR and Dr Ashok For having successfully indexed our journal. It is a great moment and I am sure our journal will get more and more articles and the quality will also improve by leaps and bounds.

Our first Tamil conference is going to be held at Thanjavur. I thank the organisers of this event Dr Gulam and his entire team, especially our dynamic Secretary Dr C J Ravi for their extraordinary commitment to make this, a historic one. I take this opportunity to welcome you all for participating and witness the beginning of a new chapter in TNOA journey.

I also want to thank the organisers of the TNOA mid year CME - Midwest Orthopaedic society- in a grand way at Yercaud and made it a huge success. That was also the first time when family Meet of the members, was held inviting all the Past office bearers and the contribution by their spouse was acknowledged in the same conference.

The TNOA music band was also inaugurated and it was very interesting. I am sure in the coming years our members will showcase their talents and take it to greater heights.

TNOA is also in the process of launching the masterclass program in our website thanks to our IT wing secretary Dr Varaprasad. Renowned surgeons who are not in the regular teaching institutions and take part in the teaching activity, are encouraged to announce their difficult and interesting cases in the website. They can then invite interested members by permitting them to witness their surgery and teaching them.

All the efforts taken by the association will be meaningful only if the members actively take part and utilise it. I am sure all will contribute and participate in this endeavour.

Long live IOA.

Long live TNOA.

Dr. V. Singaravadelu
President - TNOA

Dear Sir,

We have applied the journal in DOAJ today (August 21st, 2023), their evaluation time is 3 to 6 months (please refer the image attached).

Points which we need to follow while the journal is under evaluation are:

1. Do not make any changes in the Editorial Board.
2. Release the issues on time.
3. Endogeneity in any issue should not exceed more than 25%.

We wish good luck and hope to receive a positive response from DOAJ.

Thanks and regards
Awani Mishra

Institute of Orthopaedics and Traumatology, Madras Medical College invites you to
CME, LIVE SURGERY & HANDS ON WORKSHOP ON
"PEDICLE SCREW FIXATION IN SPINE"
In honor of the superannuation of Professor Nallu R Uvaraj

Date: May 27, 2023, Venue: Tower Block 3, 8th Floor Auditorium, Madras Medical College, Chennai - 3

ABOUT THE COURSE:
Pedicle screw fixation is the backbone of surgical procedures on the spine. It is important that an orthopaedic surgeon masters the nuances of pedicle screw placement to perform safe spine surgery to ensure optimal outcomes for the patient. It was the philosophy of Prof Nallu R Uvaraj who has always insisted on teaching and mastering the basic surgical techniques to equip postgraduates and young spine surgeons with the essential skills to perform safe spine surgery. In line with his philosophy, the Orthopaedic Spine Surgery Unit of the Institute of Orthopaedics, Madras Medical College is conducting a CME, live surgery and hands on saw bone workshop on spinal pedicle screw fixation. We are happy to bring together eminent and experienced faculty to teach postgraduates and young spine surgeons the technical nuances of spinal pedicle screw fixation.

Editors FOREWORD

It is a pleasure to bring an Educational Companion of the Knee joint in respect to Arthroscopy and Arthroplasty. The event of OASIS KNEE CON is an Advanced CME in the Knee joint. I am grateful for the Tamil Nadu Orthopaedic Association and Orthopaedic Association of South India for providing an opportunity to conduct this educational event.

As the Organising director of the OASIS Knee Con 2023 at Madurai, we wish to create a Manual that will be useful for those who want to have core knowledge in Knee Arthroscopy and Arthroplasty.

Arthroscopy is a subject that is less taught during the postgraduate training. Arthroscopy is currently getting a more eye as before. It is getting popular Minimally Invasive Arthroscopy and Arthroplasty of Knee joint are very practical topics which can be mastered if one has a good guide along with stepwise learning. Arthroscopy once it started on a simple diagnostic work has expanded and developed to an extent that there are few hundred variety of procedures nowadays.

The Knee joint arthroscopy can be said as the one that would be taught first where one enters into arthroscopy training. During learning process, there are lots of real time knowledge that one has to acquire. To cite a simple example, for doing a femoral tunnel in ACL reconstruction one has to maintain a 135 degree knee flexion and if that flexion is not maintained then the end point of both jts will be suboptimal. The objective in this knee manual is to bring topics in a well focused manner with the topics not getting longer than one or two pages. The idea behind is that the topic should be easily readable, should be crisp and relevant to that particular information. It is a commendable work from number of excellent arthroscopy and Arthroplasty surgeons across India.

The written topics are all the real time experience of the busy practicing surgeons along with scientific basis. We have tried to cover Osseous Aspects, Cartilage Aspects, Meniscus lesions, Ligament lesions, Distraction, Biomechanics and Surgical aspects of Total Knee Replacement.

I always feel that, our profession becomes meaningful and complete only when our knowledge is shared and transferred to the young aspirants. The benefit of learning should get the patient outcome much better and we should set a benchmark in patient satisfaction after surgical procedure.

With great respect to all the authors who have contributed to this Knee Manual, I want to thank my wife, mother who have strongly encouraged me to do this and I wish to dedicate this manual to all my trainees who have let me to do this work.
